

DIY deck lamps

Material

- rounded wood fence my choice: 4" x 4"
- Vintage Edison Bulb (e.g. KINGSO E27)
- lamp socket vintage E27 (copper)
- White cord cable
- optional: colors e.g. chalk paint

Equipment

- drilling machine
- screwdriver
- hot glue gun
- rubbing paper

Tutorial

- 1) saw a piece of the wood fence to a height of 12 "
- 2) drill a hole in the middle of the wood fence (measure your lamp socket for details)
- 3) lead your white cable through the hole in the middle
- 4) install your lamp socket, as it will be described on your lamp socket (or use youtube for help)
- 5) fix your lamp socket with hot glue

5) optional: paint your wood lamp

- sand your complete wood stand and use color - e.g. chalk paint and apply it 2 times
- decorate edges with another color e.g. Spray Paint in Copper Metallic Finish

YOU MADE IT 😊
